

A Place for Frogs Nonfiction Text Structure Booklets

Class Booklet

Make eleven copies of the map (below) and one copy of the cover sheet (below). Then bind all twelve pages into a book.

Divide students into small groups. Using *A Place for Frogs* by Melissa Stewart (illus. by Higgins Bond), students can write down the name of each frog species as well as the human cause that's helping that frog and the specific effect on the animal. Then the children can color in the frog's range on the map.

Individual Booklets

For each student in your class, make eleven copies of the map (below) and one copy of the cover sheet (below). Then bind all twelve pages into a book.

Using *A Place for Frogs* by Melissa Stewart (illus. by Higgins Bond), students can write down the name of each frog species as well as the human cause that's helping that frog and the specific effect on the animal. Then the children can color in the frog's range on the map.

Note: Even though the end papers contain twelve maps, the Green Frog does not have an accompanying cause and effect page. So, it's best not to include this frog in your students' books.

Name of Frog: _____

Cause: _____

Effect: _____

A
Place
for
Frogs
