

Butterfly Lifecycle Song

(To the tune of "Mary Had a Little Lamb")

Butterflies lay their eggs,
Here and there –
On leaves and twigs.
Butterflies lay their eggs,
Then they fly away.

Caterpillars hatch from eggs.
They creep and crawl,
Chomp and chew.
Caterpillars grow and grow,
Then they shed their skin.

Wrapped inside a chrysalis,
Pupae change.
They grow wings.
They slip out of that chrysalis,
And slowly spread their wings.

Butterflies flit and fly,
They search and seek
For a mate.
Butterflies lay more eggs,
Then they fly away.
